Warning

The following presentation may contain minor graphic events intended for adult, immature audiences. Viewer discretion is advised.

A brief history of the FMNH EMu-verse

**Making a Needful Thing
a useful thing.**

BASED ON THE BEST SELLING BOOK BY STEPHEN KING
JUNCO

A black and white movie poster for 'Pet Sematary'. The top half shows a silhouette of a man holding a shovel, standing in a graveyard with several crosses visible. The bottom half shows a dense field of corn stalks, with several animal skulls scattered on the ground. The text is centered and reads: 'WHAT EXISTS', 'SOMETIMES DEAD IS BETTER', and 'PET SEMATARY' in red. At the bottom, it says 'BASED ON THE NOVEL BY STEPHEN KING SCREENPLAY BY JEFF BUHLER'.

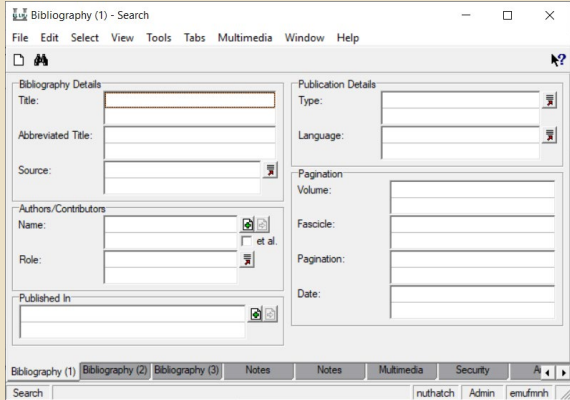

WHAT EXISTS

Number of duplicate "types" of data

What are the problems?

- Tab switching on Type that allows for Read only of parent tabs, but causes confusion with users.
- Citation Strings: Summary lines built in place of Citation Strings based on Record Type values.
 - Restricts adding New values to the module
 - No alternative Citation Strings built.
- No single field for Authors etc. where report writing is concerned. In order to write a report with a citation, modification of the Summary Data is the only option.

User's put citations in Notes fields everywhere to avoid using Bibliography and nullify the functionality built into EMu.

Even when the citation doesn't belong with the data associated with the Note field.

Details
Cited In:
Verified By: Date:
Cited Locality: Argentina, Terr. Tierra del Fuego, ca. 16-17 km. W. of Ushuaia, on road to Lapataia, C. Bandera.
Remarks: Journal of the Hattori Botanical Laboratory 26: 262. 1963
Primary Citation: Yes No

Habitat Notes: Egg provided by Bert Langerwerf. See O. Rieppel (J. Herp., 1994) for details. "Field" # corresponds to specimen # used in publication.

Report Writing:

Creating a Short Citation requires formula's that look like: `Replace(right ({NarBib_csv.SummaryData},InStr (strreverse ({NarBib_csv.SummaryData}),"]"), "]" , "")`
If ("et al." in{@RemoveType}) Then
left ({@RemoveType},InStr ({@RemoveType}, ",")) & " et al. (" & {NarBib_csv.BooPublicationDates} & ")" Else
left ({@RemoveType},InStr ({@RemoveType}, ",")) & " " & {NarBib_csv.BooPublicationDates} & ")" ;

What we are proposing

Evisceration.

The image features a roadwork sign in the foreground, with the word "ROADWORK" written in bold, black, sans-serif capital letters. The sign is yellow with a black border and is mounted on a wooden post. In the background, a road is under construction, with a large concrete mixer truck pouring concrete into a form. The scene is set in a wooded area with trees and a bright sky. The overall color palette is warm, with yellows, oranges, and browns.

FUNCTIONALITY

G. VALMONT THOMAS

UNABRIDGED

Validate Reference Tool

The image shows a software dialog box titled "Validate Reference". It has a blue title bar with a close button (X) on the right. The main area is light gray and contains four input fields: "Parent:" (a text box with a green plus icon and a right-pointing arrow icon), "Citation String:" (a text box), "DOI:" (a text box), and "Source" (a dropdown menu). At the bottom, there are three buttons: "Update" with a green checkmark icon, "Cancel" with a red X icon, and "Help" with a blue question mark icon.

The rest of the fields currently exist. We've eliminated the duplicates and have chosen a single instance of that field type. All "Type" records use the same backend fields.

Things to consider

- The 5% of the time the citation doesn't already exist.
- We are also data providers, which means sometimes we are tracking the publication before it is published and the module has to function at that level.
- Functionality in other modules based off this module (e.g. Taxonomy) and will changes affect those functions.
